

Outlast®

COOLS DOWN when the officer is **HOT**.
WARMS UP when the officer is **COLD**.

Enforcer 6000
Concealable Vest

HEAT MANAGEMENT CARRIER OPTION

Originally developed for NASA, Outlast® utilizes phase change materials called Thermocules™, that absorb, store and release heat for optimal thermal comfort.

U.S. Armor has incorporated this revolutionary technology into the fabric of our body armor carriers drastically improving the comfort of the officer on the job and promoting everyday body armor wear. This new technology effectively regulating the skin's microclimate in real time.
